DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 17-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO-0030406.

WO-0030406 discloses a heating layer (85, 86), a radiating layer (107), a thermally insulating layer (145), the insulating layer and radiating layer on either side of the heating layer (Figure 5), wherein the structure is substantially in the form of a sheet (106), and reinforcing fibers (60). While WO-0030406 does not disclose radiating additives, radiating additives are conventional and well known in the art. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have included radiating additives as a means for a more uniform heating.

Allowable Subject Matter

3. Claims 1-16 are allowed.
